( supportive shell / documentary / prehistoric / extinct carnivore / elephant sized )

**ACTIVITY 6:** Read the clues and the paragraph on elephants below.

- the largest land mammal in the world
- live in herds as families in the jungle
- large ears and long trunks
- swim and smell well

- herbivores
- only eat plants
- active throughout the day and rest only for few hours
- become more active at night
- females are called she-elephants

The elephant is the largest land mammal in the world. They live in herds as families in the jungle. The elephants have large ears and long trunks. They can swim and smell well. The elephants are herbivores. It means they only eat plants. Usually, the elephants are active throughout the day and rest only for few hours. They become more active at night. The female elephants are called she-elephants.

Now write a similar paragraph on lions using the given clues.

- the 2<sup>nd</sup> largest member of the cat family
- live in prides as families in grasslands
- mane around the neck and a long tail
- sharp nails and teeth

- leap for about 11 meters
- carnivores
- eat only flesh of other animals
- active during the night and love to rest during the day time
- become more active during night.
- female called lioness
