

Provincial Department Of Education – Sabaragamuwa
WEEKLY SCHOOL

Subject : Science

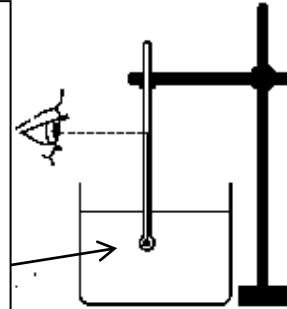

Week : 6th of 3rd Term

Grade 7

Prepared by- Nadee Gunathilake, R/Bal/St.Agnes' B.V.

Using thermometer correctly

- Thermometer should be held vertically. So, that the bulb of the thermometer is well in contact with the substance / liquid of which the temperature should be measured.
- When taking the readings the thermometer should be adjusted to the eye level.
- Eye should be kept correctly in line with the mercury column as shown in Figure
