Devices with Embedded Computers

Figure 1

Figure 2

- Figures 1 and 2 above show the changes in the methods used to wash clothes in the past and present, respectively.
- Nowadays, washing machines have been developed that can operate automatically after washing with proper instructions. These washing machines are powered by computer programs.
- Devices that work in conjunction with computer programs are called devices with advanced computers.

Exercise

- 1. Name three other devices you know that include advanced computer programs.
- 2. Find images of the devices you wrote above and paste them under the heading Devices with Advanced Computer Programs.
- 3 Write down the 03 advantages and disadvantages that we get due to the tools included in the embedded computer.
