විෂය - science

Week-19

ශ්‍රේණිය - 08

සැකසුම - Zonal Education Office
Embilipitiya

Study the pages 51 and 52 carefully.

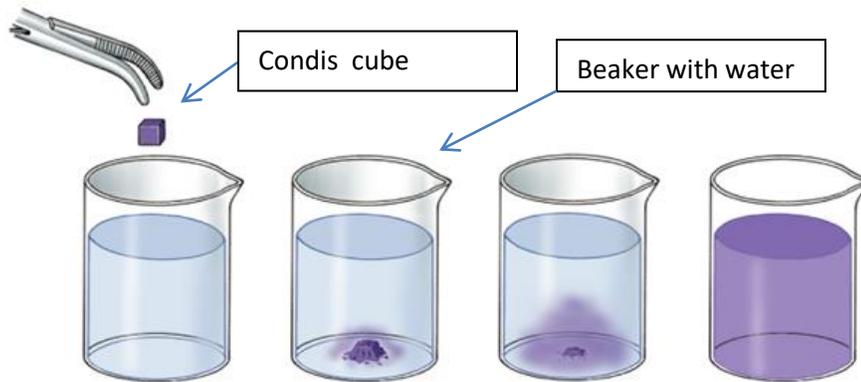

1. Give examples of 3 instances in which material **transport** takes place in plants.

2. Explain what is the **diffusion**.

3. Explain the following phenomena.

- I. When the peel of a lemon fruit (“Narang”) is removed. That smell is felt by someone in the distance.
- II. When cooking noodles, making them bigger and softer.
- III. If you place a sugar cube in water the sugar will sweeten the water without having to stir it.

4.

Explain how diffusion occurs when put a condis cube to a water filled beaker.
