## Let's use the Computer Laboratory Correctly

It is your responsibility to use the resources available at your school's computer lab correctly and safely. It is very important to take care of your security and the security of your devices. The etiquette you should follow is to behave in a way that does not disturb others in the computer lab and not to interfere in other people's computer activities.

Also, when you use a computer, you have to follow the appropriate posture. Failure to do so can lead to various health problems such as eye pain and back pain.

**Use the (✓) mark in brackets if appropriate and the (✗) mark in inappropriate if the following activities are to be performed in the computer lab.**

- (01) Jumping and playing in the computer lab ( )
- (02) Connecting external storage devices to a computer without performing a virus test ( )
- (03) Dusting all equipment in the computer lab daily ( )
- (04) Connecting to the internet and watching videos without informing the teacher ( )
- (05) Avoid bringing food, beverages and other liquids into the laboratory ( )
