Subject : science

week: 25

Grade : 6

Mawanella Educational Zone

7. Lesson - Magnet

Activity 1 :

- Name 5 situations in which magnets are used in everyday life.
- What can you observe when a piece of magnet touches the sand?
- What are the observations made when a piece of magnet is attached to the pins?
- Do the 7.1 assignment in the magnet lesson in the text book.

Activity 2:

- Suggest a way to remove the attachment from the glass without touching the glass as above.
- Perform 7.1 activity and complete the table below.

Material that is attracted to a magnet	Material that is not attracted to a magnet

- Write down the names of the types of magnets you have seen and draw pictures.

Type of magnets	Shape
