### Audio and video editing software

We record and edit the special events of our day to day activities such as school performances, gift giving ceremonies, birthday parties etc.

In those cases, specialized software was developed for editing audio and video recordings.

- Audio editing software is also known as audio editing software.
- Video editing software is also known as video editing software.

1. Below are some examples of audio and video editing software. Enter the correct English letter in the table provided.

Adobe Audition CC
