

Department of Education, Sabaragamuwa Province – Weekly School

Grade: 6

Subject: - Mathematics

Week : 24

Unit : - Indices

No. of Periods : 04

When a number is multiplied repeatedly by the same number when written in a concise way is called index form.

Example : - $5 \times 5 \times 5 = 5^3$

Show in index form.

Product	Index Form	How it is read
$3 \times 3 \times 3 \times 3$	3^4	Three to the power four
$2 \times 2 \times 2 \times 2 \times 2$		
6×6		
$9 \times 9 \times 9$		
$4 \times 4 \times 4 \times 4 \times 4 \times 4$		
$7 \times 7 \times 7 \times 7$		

Finding the value of a power.

Example : - 1) Find the value of 2^4

$$\begin{aligned} 2^4 &= 2 \times 2 \times 2 \times 2 \\ &= 4 \times 2 \times 2 \\ &= 8 \times 2 \\ &= 16 \end{aligned}$$

Example :- 2) Find the value of $2^3 \times 3^2$

$$\begin{aligned} 2^3 \times 3^2 &= \underline{2 \times 2} \times 2 \times 3 \times 3 \\ &= \underline{4} \times \underline{2} \times 3 \times 3 \\ &= \underline{8} \times \underline{3} \times 3 \\ &= \underline{24} \times 3 \\ &= 72 \end{aligned}$$

- ❖ Complete the exercise 24.1 in your text book given in the page number 149 and 150.

Representing a number as a power of a given number.

Example :- 01

Express the number 16 as a power of 2

$$\begin{array}{r} 2 \overline{) 16} \\ 2 \overline{) 8} \\ 2 \overline{) 4} \\ 2 \overline{) 2} \\ 1 \end{array} \quad 16 = 2 \times 2 \times 2 \times 2 = 2^4$$

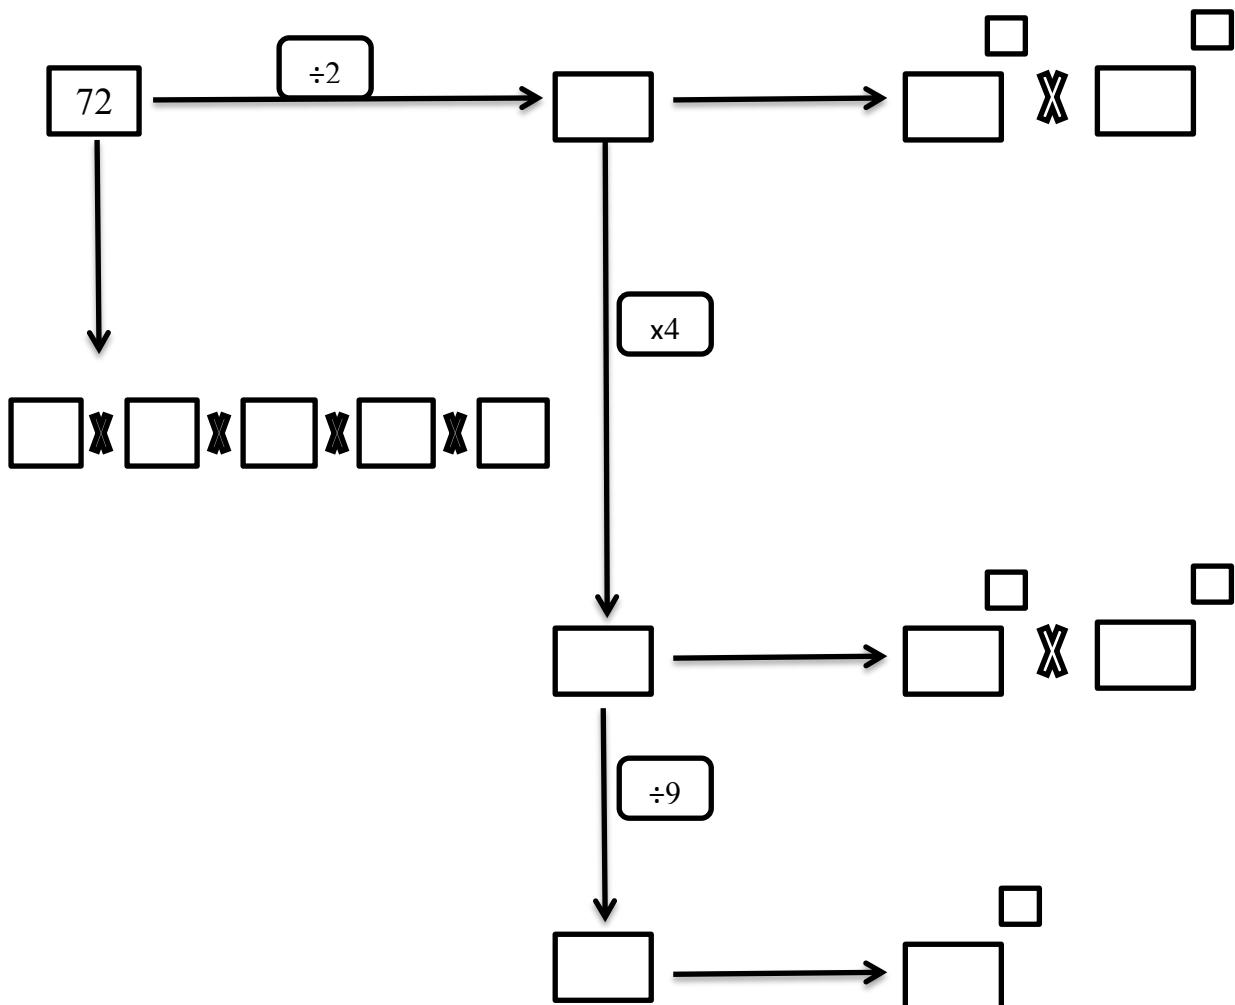

Example :- 02

Express the number 125 as a power of 5

$$\begin{array}{r} 5 \overline{) 125} \\ 5 \overline{) 25} \\ 5 \overline{) 5} \\ 1 \end{array} \quad 125 = 5 \times 5 \times 5 = 5^3$$

- ❖ Complete the exercise 24.2 in your text book given in the page number 151.

- ❖ Fill in the blanks using the experience you got from this lesson.

- ❖ Do the miscellaneous exercises in your text book given in the page number 152.
