Lesson 5 - Algorithms and flow charts

Practical problem solving process

Each problem can be divided into 3 basic parts. They are input, process and output. It is called problem analysis.

Ex: - Making a fruit salad

Input - different fruits

Process - Fruit washing, fruit cutting, mixing

Output - Fruit Salad

Write the input, process and output related to the problem analysis below.

❖ Creating a Vesak Lantern

Input :-

Process :-

Output :-

❖ Making a delicious mango pickle

Input :-

Process :-

Output :-

❖ Find the sum of two numbers

Input :-

Process :-

Output :-
