## **Computer Software**

Software are logical components of computer, which can't be seen and touched. Softwares are used to run the computer in an efficient manner. Without software, computer is like a vehicle without fuel. These are four major types of software:

- 1. System Software
- 2. Application Software
- 3. Utility Software and Service Programme

System Software:

System softwares are those which are provided by manufacturers to the user. They are used to control the computer system and increase computer performance.
