12. Bio-diversity

Natural ecosystems and man-made ecosystems

1. Sketch the classification of ecosystems in Sri Lanka.
2. Complete the below tables.

Natural aquatic environments		Feature	Importance	Examples
Freshwater	Rivers			
Marine				
Brackish				

Natural terrestrial environments		Feature	Importance	Examples
Forests	Tropical rain forests			
Grasslands				

3. What do you mean by agricultural environments?
4. Why bio-diversity is limited due to agricultural environments?
5. How can define the industrial environments?
6. What are the adverse effects of industrial environments?
7. Define the settlement environments.
8. What are the problems that have arisen due to improper human settlements?
