(10 marks)

Test 13

Read the passage and answer the given questions.

Most bats are insect eaters. In a few hours' hunting, one bat may catch and eat several hundred insects. There are places where it is easy to see bats setting out to hunt. You can see them setting out from caves, church towers, and tunnels etc. Their flight is silent and the night tends to hide them and the night attracts insects and the insects attract bats.

A little brown bat is a chance to watch a remarkable animal in action. It flies and hunts with great skill. It speeds across a room or porch, yet touches nothing. It uses echolocation to fly with wings and the power of flight.

1. Write two places that bats are setting out to hunt.
 - i. ii..... (1 mark)
2. Underline the correct answer
Most bats like (fruit / insect / grass) (1 mark)
