Web designing using Multimedia

Creating tables using HTML

Following tags use to create tables.

1. Creating the table `<table> </table>`

Attributes that can be used with table tag:-

- i. Inserting a border to the table - `<table border="1px">`
- ii. Aligning the table - `<table align="right">`
- iii. Height of the table - `<table height="20px">`
- iv. Width of the table - `<table width="15px">`
- v. Inserting a background color to the table - `<table bgcolor="yellow">`

2. Creating rows of the table - `<tr></tr>`

3. Creating columns for each row - `<td></td>`

4. Inserting column headings - `<th></th>`

5. Inserting a caption for the table - `<caption></caption>`

6. Aligning the caption of the table - `<caption align="bottom"></caption>`

Create a web page by adding different types of tables using HTML tags and attributes.
