

# Artificial Environment and Green Concept

1. List out the chemical substances which we use in our day to day life.
2. What can we be taken to use natural substitutes instead of chemical substances?
3. What are the basic principles that should be abided by when constructing green buildings?
4. How can be used the technology when constructing green buildings to obtain maximum benefits?
5. Write some concepts which include green transportation.
6. What do you mean by 'carbon footprint'?
7. Do the exercise.
