

Kovid 19- Weekly School - Sabaragamuwa Health and Physical Education

Grade 09

Week of October 02

Identify Gender Responsibilities

Breeding is a characteristic of every animal. Biologically, gender is determined by genes inherited from parents. Awareness is needed to avoid superstitious beliefs and to maintain good reproductive health.

1. What is biological gender?
2. What is gender?
3. What are the differences in gender?
4. What are the situations that have arisen due to ignorant activism about gender?
5. What measures can be taken to prevent this?
