

Grade 09 Week 03 November Overcome Social Challenges

Today, disasters caused by climate change are growing rapidly. Damage caused by this includes the spread of disease, property damage, displacement, mental distress and disruption of education. Also, Sri Lanka is a multi-ethnic country. Its Sinhalese, Tamils, Muslims and Bangars live together. People from different cultures in the same society should work together to avoid problems when living together.

1. What are the causes of disasters?
2. Write examples for natural disasters.
3. Write down three damages caused by a disaster.
4. What are some aspects of human diversity?
5. What are the potential problems with that diversity?
6. What can be done to avoid such problems?
7. What are the skills we need to develop in society to minimize such problems?
8. Create based on culture. (Short note / Illustration / Excerpt / Lyrics / Report)
