## 7 . Magnet

1. Write the instances where you find magnets in day-today life.
2. You are given a magnet and various other materials. Identify the materials, that are attracted to magnets and the materials that are not attracted to magnets. List them and fill the grid given below. (activity 7.1)

Materials attracted towards the magnets	Materials did not attract towards the magnets

3. Do activity 7.3
4. Draw and name the different types of magnets you know.
5. You are given a bar magnet and some file clips. Write the way, how do you identify the poles of magnets. Draw a diagram to show that.
